

**Department of Computer Science
City University of Hong Kong
CS2204 Fundamentals of Internet Application Development
Tutorial 5b – Using Form and Video**

ASSESSMENT OF THE LEARNING OUTCOMES:

- Build simple form to send information to server/other page
- Learn to use video tag for embedding video in Web page

Create Web page with form and video

- Build a Web page as shown in the screen shot below.
- The form consists of a text box, a set of radio button for making a single choice, 2 videos together with 2 checkboxes for making multiple choices.
- Form is described in HTML2.ppt
- Method *get* should be used for the form with data sent back to <http://courses.cs.cityu.edu.hk/cs2204/t5b-echo.html>.
- In order for the t5b-echo.html to work, the following names must be used :
 - firstname - text box
 - agegroup - radio button
 - nature - checkbox for the first video
 - wonders - checkbox for the second video
- The videos should be written in a way that :
 - they could be played in Firefox, Chrome and IE (or even Safari)
 - control bars are shown
 - no auto-play, only play when started by clicking
 - first video - <http://courses.cs.cityu.edu.hk/cs2204/nature.mp4> (and .ogg)
 - second video - <http://courses.cs.cityu.edu.hk/cs2204/wonders.mp4> (and .ogg)

The screenshot shows a Firefox browser window with a tab titled 'Use of Form & Video'. The address bar shows a local file path: `file:///C:/nrdrive/WORDDOC`. The page content is a survey form titled 'Like your video - A Survey'. The form includes a text input field for 'Your first name', a radio button group for 'Your Age Group' with options '11-20', '21-40', and '41-60', and two video thumbnails. Each video has a 'like' checkbox next to it. The first video shows a herd of white animals in a field, and the second shows a desert landscape with sand dunes. At the bottom of the form are 'OK' and 'clear' buttons.
